# Name: Arun Pratap Singh
My Project: Zenkart (ecommerce website)

Overview

The purchasing and selling of goods and services via electronic means, especially the Internet, is referred to as e-commerce or electric commerce. The Internet has grown at the fastest rate in the last decade. Online purchasing, in particular, is a fast-expanding e-commerce sector. Online stores are typically open 24 hours a day, and many consumers have access to the Internet at both work and home. A successful online business is more than just a well-designed website with dynamic technical features that appears in multiple search engines.

Zenkart is a clone of flipkart.

Homepage:-

Technology Used:

Front-End:

1. Html
